WORK EXPERIENCE

Spire Communications - *Remote*

May 2022 - Present

Frontend Developer

Worked with a team of designers and developers creating and implementing new content or designs for clients' websites. My day-to-day tasks included creating webpages based on designs sent from the web designers, updating clients' content, making functional and user-friendly webpages, and going to meetings with other team members or clients to discuss future steps or plans for the website.

BECK DIGITAL - *Greenville, SC*

April 2021 - April 2022

Senior Web Developer

I built websites for clients in WordPress from content sent from the client or by implementing designs sent to me by Beck Digital designers. Also, worked with clients on keeping content up to date. Adjusted website for optimization based on Google Search Console recommendations.

Relentless Church - *Greenville, SC*

May 2018 - October 2020

Web Developer

My tasks as the web developer at Relentless Church are mainly Front-End. I focus on updating their website daily. Also, I work on making their site look modern and user-friendly for all their followers. While most of my tasks are in Front-End, I also have many tasks outside of that realm. For instance, I make sure their mobile application is up to date, and I do Back-End Development on their WordPress website. Some major projects I have worked on for Relentless Church have been their two conference websites; The One Conference, and The Align Conference.
